

# Percentage Increase and Decrease

## Bar Modelling

Aim: I can use bar modelling to increase and decrease by percentages.

### Section 1

Here are some bars divided into equal parts. Complete the percentage in each part of the bar. The first one is done for you:

50%					50%						

### Section 2

In the following bars show how you can use a combination of the above to make the following percentages. The first one is done for you:

75%

25%			25%			25%					
-----	--	--	-----	--	--	-----	--	--	--	--	--

or

50%						25%					
-----	--	--	--	--	--	-----	--	--	--	--	--

60%

--	--	--	--	--	--	--	--	--	--	--	--

30%

--	--	--	--	--	--	--	--	--	--	--	--

80%

--	--	--	--	--

85%

--	--	--	--	--	--	--	--

45%

--	--	--	--	--	--	--	--

15%

--	--	--	--	--	--	--	--

95%

--	--	--	--	--

### Section 3

50% of 140 = 70

50%	50%
-----	-----

70	70
----	----

25% of 260 =

--	--	--	--

--	--	--	--

40% of 380 =

--	--	--	--	--

--	--	--	--	--

90% of 510 =

--	--	--	--

--	--	--	--

75% of 420 =

--	--	--	--

--	--	--	--

60% of 160 =

80% of 80 =

70% of 740 =

30% of 620 =

#### Section 4

To decrease a number by 10%, find 10% and subtract this from the number.

Decrease 80 by 10%.

									10%
									8

10% of 80 = 8      80 - 8 = 72      80 decreased by 10% = 72

Decrease the following numbers by 10%.

140

--	--	--	--	--	--	--	--	--	--

60

--	--	--	--	--	--	--	--	--	--

150

--	--	--	--	--	--	--	--	--	--

230

--	--	--	--	--	--	--	--	--	--

380

--	--	--	--	--	--	--	--	--	--

760

--	--	--	--	--	--	--	--	--	--

980

--	--	--	--	--	--	--	--	--	--

1020

--	--	--	--	--	--	--	--	--	--

## Section 5

To increase a number by 10%, find 10% and add this to the number.

Increase 80 by 10%

100%	10%
------	-----

80	8
----	---

10% of 80 = 8.     $80 + 8 = 88$     80 increased by 10% = 88

Increase the following numbers by 10%.

170

--	--

280

--	--

450

--	--

50

--	--

490

--	--

610

--	--

770

--	--

920

--	--

## Section 6

1. A bag of popcorn costs £1.20. A shop discounts bags of popcorn by 10%.

What is the new cost?

--	--	--	--	--	--	--	--	--	--

2. An athlete's best time for running 400m is 50 seconds. After a year's training the athlete cuts their time by 10%. What is their new best time?

--	--	--	--	--	--	--	--	--	--

3. A grocer normally buys 670kg of potatoes each week. One week he decides to buy 10% less potatoes. What mass of potatoes does he buy?

--	--	--	--	--	--	--	--	--	--

4. A school raises £420 for their chosen charity. In the previous year, the school raised 10% less. How much did the school raise the previous year?

--	--	--	--	--	--	--	--	--	--

5. A shop has to increase the cost of a set of books by 10%.

The original price was £25. What is the new price?

--	--	--	--	--	--	--	--	--	--

6. A football team has an average attendance of 5680 in one season. The following season their average attendance increases by 10%. What is the new average attendance?

--	--	--	--	--	--	--	--	--	--

7. A runner is training for a marathon. One week she runs 44 miles over the whole week. In each of the next two weeks, she increases the distance she runs by 10%. How far will she have run in the second week? Round the answer to one decimal place.

--	--	--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--	--	--

# Percentage Increase and Decrease

## Bar Modelling Answers

Aim: I can use bar modelling to increase and decrease by percentages.

### Section 1

Here are some bars divided into equal parts. Complete the percentage in each part of the bar. The first one is done for you:

50%	50%
-----	-----

25%	25%	25%	25%
-----	-----	-----	-----

20%	20%	20%	20%	20%
-----	-----	-----	-----	-----

12.5%	12.5%	12.5%	12.5%	12.5%	12.5%	12.5%	12.5%
-------	-------	-------	-------	-------	-------	-------	-------

10%	10%	10%	10%	10%	10%	10%	10%	10%	10%
-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%
----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----

### Section 2

In the following bars show how you can use a combination of the above to make the following percentages. The first one is done for you:

70%

25%	25%	25%	
-----	-----	-----	--

or

50%	25%	
-----	-----	--

60%

20%	20%	20%		
-----	-----	-----	--	--

30%

10%	10%	10%							
-----	-----	-----	--	--	--	--	--	--	--

80%

85%

45%

15%

95%

### Section 3

50% of 140 = 70

25% of 260 = 65 - find 25% by halving and halving again (130, 65)

40% of 380 = 152 - find 20% by dividing by 10 and doubling (38, 76)

90% of 510 = 459 - find 90% by subtracting 10%, adding 50% + 20% + 20% or  $10\% \times 9$

75% of 420 = 315 - find 75% by subtracting 25%, adding 50% + 25% or  $25\% \times 3$

60% of 160 = **96** - find 60% by  $20\% \times 3$  or  $10\% \times 6$

<b>20%</b>	<b>20%</b>	<b>20%</b>		
<b>32</b>	<b>32</b>	<b>32</b>		

80% of 80 = **64** - find 80% by  $20\% \times 4$  or  $10\% \times 8$  or subtracting 20%

				<b>20%</b>
				<b>16</b>

70% of 740 = **518** - find 70% by adding 50% and 20% or  $50\% + 10\% + 10\%$

<b>50%</b>	<b>10%</b>	<b>10%</b>			
<b>370</b>	<b>74</b>	<b>74</b>			

30% of 620 = **186** - find 30% by  $10\% \times 3$

<b>10%</b>	<b>10%</b>	<b>10%</b>							
<b>62</b>	<b>62</b>	<b>62</b>							

## Section 4

To decrease a number by 10%, find 10% and subtract this from the number.

Decrease 80 by 10%.

									<b>10%</b>
									<b>8</b>

10% of 80 = 8       $80 - 8 = 72$       80 decreased by 10% = 72

Decrease the following numbers by 10%.

140

									<b>14</b>
--	--	--	--	--	--	--	--	--	-----------

**10% of 140 = 14       $140 - 14 = 126$       140 decreased by 10% = 126**

60

									<b>6</b>
--	--	--	--	--	--	--	--	--	----------

**10% of 60 = 6       $60 - 6 = 54$       60 decreased by 10% = 54**

150

									15
--	--	--	--	--	--	--	--	--	----

**10% of 150 = 15**

**150 - 15 = 135**

**150 decreased by 10% = 135**

230

									23
--	--	--	--	--	--	--	--	--	----

**10% of 230 = 23**

**230 - 23 = 207**

**230 decreased by 10% = 207**

380

									38
--	--	--	--	--	--	--	--	--	----

**10% of 380 = 38**

**380 - 38 = 342**

**380 decreased by 10% = 342**

760

									76
--	--	--	--	--	--	--	--	--	----

**10% of 760 = 76**

**760 - 76 = 684**

**760 decreased by 10% = 684**

980

									98
--	--	--	--	--	--	--	--	--	----

**10% of 980 = 98**

**980 - 98 = 882**

**980 decreased by 10% = 882**

1020

									102
--	--	--	--	--	--	--	--	--	-----

**10% of 1020 = 102**

**1020 - 102 = 918**

**1020 decreased by 10% = 918**

## Section 5

To increase a number by 10%, find 10% and add this to the number.

Increase 80 by 10%

100%	10%
------	-----

80	8
----	---

10% of 80 = 8.

80 + 8 = 88

80 increased by 10% = 88

Increase the following numbers by 10%.

170

170	17
-----	----

**10% of 170 = 17      170 + 17 = 187      170 increased by 10% = 187**

280

280	28
-----	----

**10% of 280 = 28      280 + 28 = 308      280 increased by 10% = 308**

450

450	45
-----	----

**10% of 450 = 45      450 + 45 = 495      450 increased by 10% = 495**

50

50	5
----	---

**10% of 50 = 5      50 + 5 = 55      50 increased by 10% = 55**

490

490	49
-----	----

**10% of 490 = 49      490 + 49 = 539      490 increased by 10% = 539**

610

610	61
-----	----

**10% of 610 = 61      610 + 61 = 671      610 increased by 10% = 671**

770

770	77
-----	----

**10% of 770 = 77      770 + 77 = 847      770 increased by 10% = 847**

920

920	92
-----	----

**10% of 920 = 92      920 + 92 = 1012      920 increased by 10% = 1012**

## Section 6

1. A bag of popcorn costs £1.20. A shop discounts bags of popcorn by 10%.

What is the new cost?

--	--	--	--	--	--	--	--	--	--

**£1.08**

2. An athlete's best time for running 400m is 50 seconds. After a year's training the athlete cuts their time by 10%. What is their new best time?

--	--	--	--	--	--	--	--	--	--

**45 seconds**

3. A grocer normally buys 670kg of potatoes each week. One week he decides to buy 10% less potatoes. What mass of potatoes does he buy?

--	--	--	--	--	--	--	--	--	--

**603kg**

4. A school raises £420 for their chosen charity. In the previous year, the school raised 10% less. How much did the school raise the previous year?

--	--	--	--	--	--	--	--	--	--

**£378**

5. A shop has to increase the cost of a set of books by 10%.

The original price was £25. What is the new price?

--	--	--	--	--	--	--	--	--	--

**£27.50**

6. A football team has an average attendance of 5680 in one season. The following season their average attendance increases by 10%. What is the new average attendance?

--	--	--	--	--	--	--	--	--	--

**6248**

7. A runner is training for a marathon. One week she runs 44 miles over the whole week. In each of the next two weeks, she increases the distance she runs by 10%. How far will she have run in the second week? Round the answer to one decimal place.

--	--	--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--	--	--

**53.24 miles rounded to 53.2 miles**
